

2017-2020 UPDATE

African Livestock Productivity and Health Advancement

Now in its fourth year, the Zoetis A.L.P.H.A. initiative has dramatically improved livestock health and farmers' livelihoods in Sub-Saharan Africa.

Advancing care

Access to medicine and technology is at the heart of our sustainable development goals.

656,000

diagnostic tests performed overall, with 1970 diagnostic kits sold to date

1.7B

doses of vaccines and medicines have been administered over 4 years

20x

more products submitted for registration approval than originally available —from 4 to 85

Expanding access

Establishing new facilities ensures the sustainability of animal health and economic development.

10 labs

are fully operational for local veterinarians in our target regions

978

professionals including laboratory personnel trained on diagnostic topics via face-to-face and virtual masterclasses

Scaling impact

Shifting to digital trainings had a positive impact, expanding the reach of training activities.

13,234

farmers, veterinarians and paraveterinarians were trained overall

657,800+

people reached via the train-the-trainer programs provided

579

representatives attended distributor training through 2020

Keeping livestock is an essential source of income for nearly **600 million** households

Regional Update

Population demographics
1 icon = 10 million

Nigeria

1,100+

serum samples were tested in the Veterinary Teaching Hospital (VTH)

72,000+

poultry tests were performed in Chi Farms Lab

5 labs

that are fully operational were opened in 2018-2020

Last mile outreach

Coolfinity fridges provided "last mile" service for vaccines and cold storage

Ethiopia

13

products now available, in a region with zero Zoetis presence before 2019

50+

veterinarians joined virtual World Antibiotic Awareness week workshops

Poultry Aid

A new agreement signed between Jimma University and Vetmedu Vienna with support of Zoetis forming an extension to the Poultry Centre of Excellence

Tanzania

1,900

professionals trained by the team and partners such as Nelson Mandela University

2 labs

that are fully operational were opened last year

21%

of people trained through the initiative were women

Pooled Vaccination

Pooled Vaccination campaign was launched in 2020 with para-vets service to the small holders on vaccination and technical advice

Uganda

4,680

poultry tests in partnership with Makerere University

10,000+

cattle were tested in Butalangu and Nabitanga in partnership with UMPCU

31%

of people trained through the initiative were women

26 swine farms

received technical and advisory services through Pooled Vaccination project in partnership with Vetline
